SERVICE MAINTENANCE WORK

Thank you for choosing Econocycle for service maintenance contact. As you are aware AWTS Septic units have to be serviced including replenishment of disinfecting agent.

Our aim is to provide you with the same quality service to match the Econocycle system.

SERVICE MAINTENANCE WORK INCLUDED

- Four (4) services
- Chlorine

During scheduled services, Econocycle will perform (where appropriate) the following:

- Ensure operation
- Renew supply of disinfecting agent
- Test water quality
- Inspect irrigation system
- Adjust air supply and sludge return controls
- Monitor sludge levels
- Monitor and record complete operation of plant
- Supply written report to owner and local authorities
- Cleaning of filters at each service

Your system is fitted with an alarm to alert you in the event of any problems.

SERVICE MAINTENANCE WORK NOT INCLUDED

- Call out for breakdown or flooded units (warranty excluded)

Please feel free to contact us to discuss any issues or questions you may have with the units operation.

Kind Regards,

Econocycle Service Department
